Student Name: Nidhi Nidhi

Date	Number of Hours	Description of work done
Apr 2, 2025	3	Finished working on providing insights with some minor bug fixes. Started working on adding category in the categories page through Google gemini. Code checked in the repo -> Implementation/views/dashboard/insights.ejs
Apr 4, 2025	2	Fixed some errors while integrating the code. Fixed some error messages when redirecting to error pages.
Apr 5, 2025	3	Conducted in-person survey for my web application and looked for feedbacks for product evaluation.
Apr 6, 2025	3	Did minor fixes in the code. Completed the category page. Now, the user can see their expense category wise along with the option to view category wise expenses from selected custom dates. Code checked in the repo ->Implementation/views/dashboard/categories.ejs

Description of work done: This week, I created the categories page which will show catergory wise expenses for the current month by deafult. User now have the option to select custom dates to track category wise expenses for the duration. Now, the app can also track expenses for the selected dates only, giving more flexibility to user to manage thier expenses. Did in-person survey for testing and product evaluation of my webApp. Noted feedbacks from user to work on it.

Next, I am going to work on user feedback. Will add file attachment option to add multiple expenses directly.

Repo Check in of Implementation completed: The files/folders I have checked in the repo are as follows:

Implementation/index.js
Implementation/routes/dash.js
Implementation/views/dashboard/insights.ejs
Implementation/views/dashboard/categories.ejs
